

CLAIMS:

1. Method of using triadimefon and/or triadimenol as a preservative for the protection of glued wood-based products against attack and destruction of microorganisms characterized in that triadimefon and/or triadimenol is applied during the manufacturing process of the glued wood-based products.
2. Method according to Claim 1, characterized in that the wood-based products are selected from wood fibre, wood chip or flake and thin wood veneer, plywood, laminated veneer lumber (LVL), medium density fibreboard (MDF), waferboard/strandboard/oriented strandboard (OSB) and particleboard.
3. Method according to at least one of Claims 1 or 2, characterized in that triadimefon and/or triadimenol are added to the glue during the manufacturing of the wood-based products.
4. Method according to at least one of Claims 1 to 3, characterized in that a mixture of glue, triadimefon

and/or triadimenol and optionally one or more solvents are applied by glue-line addition.

5. Method according to at least one of Claims 1 to 4,
5 characterized in that a mixture of triadimefon and/or triadimenol and at least one further active selected from the series of fungicides and insecticides is employed.
6. Method according to at least one of Claims 1 to 5,
10 characterized in that a mixture of triadimefon and/or triadimenol and at least one compound selected from tebuconazole and cyproconazole is employed.
7. Composition for the protection of glued wood-based
15 products against attack and destruction of microorganisms containing a glue, triadimefon and/or triadimenol.
8. Composition according to Claim 7, containing one or more
20 further actives selected from fungicides and insecticides and optionally one or more solvents compatible with the glue or is suspended or emulsified in water
9. Composition according to Claim 7, containing water as the solvent.

10. Glued wood-based product containing triadimefon and/or triadimenol.
